Note: The term "backlog" of NPDES permit applications includes only those permits which have been administratively extended after a renewal application was submitted in a timely manner (prior to the expiration of the permit), but for which a draft permit has not yet been placed on public notice. The NPDES backlog (shown on the chart and on line 2 [the second line] of the table) has been reduced from approximately 673 in January 1998, to the number currently displayed on the chart. Renewal applications are due 180 days prior to the expiration of the permit. Thus, a number of applications already are on file with the Office of Water Quality for permits which are still "active" and therefore not yet considered part of the backlog (see line 3). Once a draft permit has been placed on public notice, it no longer is considered as "backlogged" because final issuance can be delayed by the applicant or other interested parties. Line 4 shows the number of permits on public notice each month. Line 5 (at the bottom of the table) shows the total number of administratively extended draft permits which have been public noticed, but have not yet been issued. This chart is a subset of the "Permit Renewals Pending" chart on the previous page.
